CONTEMPORARY MODES OF PUBLIC CONTROL APPLIED TO THE INTERACTION BETWEEN INSURANCE AND BANKING SECTORS

The paper reviews the modes of public control applied to the interactions between the insurance and the banking sectors, identifying two approaches, i.e. consolidated and sectoral, this task. It is concluded that these modes shall include declaring certain transparency requirements for the insurance company accreditation at the Russian banks based on three main principles, i.e. openness, transparency, and non-discrimination

Keywords: state regulation, integration, bank, insurance company, financial policy.

Lebedeva K. M., PhD Student of Financial Markets and Banks Department Financial University under the Government of Russian Federation

E-mail: kmllebede@gmail.com

INVESTORS' BEHAVIOR MODELS IN EUROPEAN FINANCIAL MARKETS

The study aims to classify investors' behavior models in European financial markets on the basis of the existing economic models, lasting preferences, values and ideological factors. The suggested approach helps explain investors' behavior during recession as well as in periods of high volatility and low liquidity in financial markets, when traditional market analysis methods are inefficient.

Keywords: investors' behavior, European markets, conceptual modelling, values, lasting preferences, risk appetite.

Badalov L. A., Candidate of Economic Sciences, Associate professor of the Department of banking, Plekhanov Russian University of Economics

E-mail: lazarbadalov@rambler.ru
